

Accepted abstracts for Oral and Poster Presentation

Corresponding author	e-mail	Organization	Abstract Title	Abstract Number
Alexandra Maertens	amaerte1@jhu.edu	Johns Hopkins Bloomberg School of Public Health, Center for Alternatives to Animal Testing	Green Toxicology: Using big data on little chemicals to guide safe design	13
Andy Forreryd	Andy.Forreryd@senzagen.com	SenzaGen	The GARD assay for skin sensitization testing – validation, predictive performance and applicability for cosmetic ingredients.	22
Beatriz Lourenco Correia Moreira	biaxuh@gmail.com	Instituto de Tecnologia do Parana - TECPAR	Validation of an in vitro assay for the detection of residual viable rabies virus in inactivated rabies vaccines.	49
Camila Braggion	camila.braggion@hotmail.com	Federal University of São Paulo	Use of the Caenorhabditis elegans as an alternative model for evaluating the allergen potential of skin sensitizers.	69
Carlos Eduardo Matos dos Santos	carlos@altox.com.br	Alttox Ltda	Contribution Mapping: a tool for Structure–toxicity relationship (STR) interpretation of the machine and deep Learning methods	82
Carol Treasure	carol.treasure@x-cellr8.com	XCellR8 Ltd	A new definition for animal-free testing. Replacing animal-derived components in regulatory in vitro methods	88
Carolina Motter Catarino	catarc@rpi.edu	Rensselaer Polytechnic Institute	Development of 3D bioprinted Reconstructed Skin models using native and non-native bioinks	35
Diogo Zoltay Alves	diogo.zoltay@mxns.com	Mérieux NustriScience	SKIN IRRITATION STUDIES FOR AGROCHEMICALS REGISTRATION: COMPARISON OF IN VITRO AND IN VIVO RESULTS	16
Esther Haugabrooks	ehaugabrooks@pcrm.org	PCRM	An international survey of acute systemic toxicity test requirements with a view towards increasing acceptance of alternative approaches	78
Fabiana Medeiros	fabiana@biosintesis.com.br	Biosintesis Laboratory, GLP Test Facility on Research and Innovation of Vitro Methods	Animal-free safety assessment for children´s articles: the first successful implementation of Reconstructed Human Epidermis (RhE) model as an in vitro test for regulatory purposes in Brazil	80

Fjodor Melnikov	fjodor.melnikov@yale.edu	Yale University	Modeling the Complex Relationships Between Chemical Properties, Adaptive Response, and Oxidative Stress	55
Helder Constantino	hconstantino@hsi.org	Humane Society International	Advancing Science Without Suffering in Brazil	50
Karina Karmirian	karina.karmirian@lance-ufrj.org	D'Or Institute for Research and Education	A high content screening platform to evaluate viral infection in human brain cells	89
Lara Barroso Brito	bbritolara@gmail.com	Federal University of Goiás	Zebrafish early-life stage as a refinement to predict acute oral toxicity	79
Larissa A Carvalho	lari.anastacio@gmail.com	University of Sao Paulo	A stochastic clonal selection for modeling intra tumor heterogeneity in human melanoma and clinical implications	100
Mariela Bollati-Fogolín	mbollati@pasteur.edu.uy	Institut Pasteur de Montevideo	Development of national capacities for the implementation of alternative methods: a new challenge in Uruguay	73
Matheus Barbosa Gomes Cruz	mbgcruz@gmail.com	Federal University of Paraná	Myocutaneous simulator for teaching suture and reconstructive surgery	26
Michelle Sabrina Da Silva	sabrina@kosmoscience.com	Kosmoscience Group	Ex vivo skin model: an alternative tool for efficacy assessment	53
Mohammad A. Akbarsha	rc@nct.ac.in	MGDC, Bharathidasan University, Tiruchirappalli, India / National College (Autonomous), Tiruchirappalli, India	Hydra, a freshwater cnidarian, offers great potential as an alternative model organism for chemical risk assessment	57
Patrick Hayden	phayden@mattek.com	Mattek Corp	Pre-Validation of an Acute Inhalation Toxicity Assay Using the EpiAirway In Vitro Human Airway Model	37
Patrick Hayden	phayden@mttek.com	MatTek Corp.	EpiOcular™ Eye Irritation Test (EpiOcular-EIT) for identification of materials not requiring classification and labeling for eye irritation or serious eye damage	59
Romina Pagotto	pagotto@pasteur.edu.uy	Institut Pasteur de Montevideo	Get 2 for 1: A dual reporter cell line for simultaneous detection of substances with estrogenic and/or androgenic activity	47
